Reviewer: Polina Amburg, PhD, RN (Monmouth University School of Nursing and Health Studies)

Description

This is an interesting and useful book that educates healthcare providers on patients' views of cancer and cancer management.

Purpose

This book is intended to give readers hope and the authors accomplished this goal with great success.

Audience

This book is an excellent tool for medical professionals, patients with cancer, and anyone interested in the topic.

Features

This book is great. Future editions could include more stories of people battling cancer around the world in different countries.
